

CROS Transmitter

A Solution for Patients with Single-sided Deafness

Beltone **Serene**™

A complete hearing solution

Bring the **Beltone Serene**™ experience to even more patients with the wireless CROS/BiCROS solution.

Our philosophy of opening more of the sound picture enables users to experience hearing clarity all around with better audibility of speech—no matter which way they're facing. With the Beltone Serene CROS/BiCROS solution, you can ensure a high quality and full sound picture for users with single-sided deafness. We now offer both the industry's smallest wireless RIE CROS and a wireless BTE CROS solution, available in eight colors to match the Beltone Serene Family.

- Discreet, comfortable designs available in both the Beltone Serene microRIE and standard BTE styles
- Programmable as a CROS or BiCROS solution
- Dual radio, including magnetic induction, sends the sound signal from the CROS transmitter to the hearing aid worn on the opposite ear
- Compatible with our full line of wireless accessories including **TV-Streamer+** and **Multi-Mic+**

Beltone Serene RIE CROS

CSE162S-DRWC

Works with RIE styles

Beltone Serene BTE CROS

CSE176-DWC

Works with rechargeable customs and BTE styles

16 hours

Battery life when
streaming audio to
the opposite ear

Direct Audio streaming

Beltone Serene CROS system is a complete solution with all the benefits of a modern hearing care solution, offering direct audio streaming and intuitive everyday use through the **Beltone HearMax™** app.
