How to match Beltone hearing aids with the correct charger

Each charger type is offered with different inserts – known as the charging form factor (CFF) – which relate to a specific Beltone hearing aid collection or style.

The CFF is indicated with a number and is shown inside the charger, next to the serial number underneath the charger and on the charger package.

CFF numbers are not shown on all charger packaging yet, please refer to the number inside the charger:

- Beltone Achieve RIE have CFF 1 shown inside the charger
- Beltone Amaze RIE & Beltone Rely RIE have CFF 4 shown inside the charger

How to tell if the hearing aids are charging

Place the hearing aids in the charger and let the lights indicator on the hearing aids guide you. It is the same process whichever charger is used.

You know that charging has started when the hearing aid lights flash slowly.

When fully charged, the hearing aid lights remain constant, not flashing.

The lights turn off when the hearing aids are removed from the charger.

Premium charger illustrated.
For more information, please see the individual user guide for each charger.
