

Technology Level Differences

ReSound Vivia™ is available in Technology Level 9, 7, 5 and 4. Understanding the differences in these technology levels is essential for recommending the most suitable solution for your patients' needs.

This overview identifies technology level differences in features such as directionality, noise reduction, automatic volume control and adjustable attack and release times. For more information or training on ReSound Vivia technology, please contact your ReSound representative.

Tech level 9

- **** 360 All-Around
- **** Clear Focus (61 & 62)
- **** Intelligent Focus (60S)
The world's smallest AI hearing aid¹ powered by our Deep Neural Network (DNN) Chip.
